

DATA SHEET

GripFactory UltraGrip

Description

GripFactory UltraGrip is the invisible anti-slip solution against slippery and / or damp floors, stairs and other surfaces made of concrete, ceramic tiles and marble. GripFactory UltraGrip is a liquid (GRIPliquid) that makes microscopic grooves in the top layer of the smooth floor. After a treatment with GripFactory UltraGrip, nothing has changed optically on your floor, but the water can now easily flow away from under feet, shoe soles or car tires, creating more grip and minimizing the risk of slips or slides.

Operation GripFactory UltraGrip

The surface (concrete, ceramic tiles, marble) must be thoroughly cleaned with our supplied cleaning agent (GripFactory UltraGrip Cleaner) prior to the anti-slip treatment. Subsequently, the surface can be treated with GripFactory UltraGrip. GripFactory UltraGrip has to work for approximately 30 to 45 minutes, depending on the surface. Subsequently, the surface must be thoroughly cleaned again to remove all excess liquids. After the anti-slip treatment with GripFactory UltraGrip, the floor is immediately accessible again.

Easy to clean

Surfaces treated with GripFactory UltraGrip are easy to clean. So you don't have to make any adjustments to your normal maintenance activities. We do, however, recommend periodic deep cleaning, depending on use. This deep cleaning ensures that the surface is in optimum condition again. In addition, the anti-slip effect gets a boost.

Private label

GripFactory UltraGrip is available in professional packaging for large consumers. There is also the option of getting GripFactory UltraGrip in private label packaging. Please contact one of our anti-slip advisors for this.

Benefits

- Can be walked on immediately after application;
- No chemical fumes on application and afterwards;
- Durable (5 year warranty, ask for the conditions);
- Invisible end result;
- Easy maintenance;
- Cheaper than a coating;
- Including deep cleaning.

Surfaces

GripFactory UltraGrip is suitable for the following surface(s):

- Ceramic tiles
- Marble & Granite
- Concrete

GripFactory UltraGrip is the most hygienic anti-slip solution available on the market and makes your slippery surface safe to walk on again.

Technical data

Subject	Tiles	Marble	Concrete
Physically	Liquid	Liquid	Liquid
Aspect	Oily	Characteristic	Characteristic
Colour	Colorless	Characteristic	Characteristic
Odor	Characteristic	Characteristic	Characteristic
Boiling point at atmospheric pressure	100° C	n/a	n/a
Vapor pressure at 20°C	2300 Pa	2300 Pa	n/a
Vapor pressure at 50°C	2300 Pa (2 kPa)	2300 Pa (2 kPa)	n/a
Density at 20°C	1010 kg / m ³	1049 kg / m ³	n/a
Dynamic viscosity at 20° C	11 cP	n/a	n/a
pH	4.2	0 - 1	1
Solubility Property	Soluble	Very soluble	Very soluble in water
Ignition temperature	Non-flammable (>60°C)	Non-flammable (>60°C)	Non-flammable (>60°C)
